 Comment. Although weapons observed fail to indicate any change in the distribution of units of the 9th Gds Tank Div in Neustrelitz, it is noted that same source, since late November, reported the installations only partially occupied.  25X1A
It is possible that, at this unusual time of the year, as was implied by source, heavy elements of the division may conduct firing practices in the Speck area which, however may last only a few days because of the season and the training program. Therefore, the occupation figures are doubted.
